Development experience

Web developer / MyDashboard application (Personal Project)

Jan - Apr 2022

1. Developed a basic and functional dashboard that included a todo list and event scheduler by using **React**, **Material UI**.
2. Implemented a drag and drop feature for the todo list by using the library of **Beautiful Drag and Drop** and using local storage to store the data of the todo list and event scheduler.
3. Created a calendar component from scratch by using **React**, **day.js** and **Material UI**. Implementing react hook **useState** to control and manage the state of all components.

Web developer / Vancouver Public Art Website (Internet Computing Technologies Class)

Sep - Dec 2021

1. Developed and designed the Vancouver Public Art website to promote the exploration of artworks throughout the city of Vancouver by implementing **HTML**, **CSS**, **JavaScript**, and **PHP**.
2. Designed and created relational databases and schemas for functionalities of login, comment, rating in **XAMPP** environment by using **MySQL**.
3. Built a live searching function and filter function for users in the website to search different type artworks by implementing **jQuery**, **Ajax**, **PHP**, and **MySQL**.

Other Experience

Volunteer / New Student Tax Return workshop (University of Manitoba)

Jan - Feb 2019

1. Helped organize a tax return event for 2019 new students.
2. Introduced upcoming events and direction for those who participated in the event.

Supervisor / Palatal Stir Fry Express (Winnipeg)

May 2016 - Jan 2019

1. Demonstrated strong leadership and communication skills through leading co-workers to provide the best customer services to clients.
2. Delivered excellent services to customers in a fast-paced environment, which required high accuracy and attention.
